Description

Using 1.9.7cvs on local (wampp), after clicking on install mod mailman (1.6), I saw the Package config screen, and after click on save for the default values, I got this message:

```
Notice: Undefined variable: info in c:\archivos de
programa\easyphp1-8\www\branch-1-9\lib\mods\modslib.php on line 408 Warning:
copy(mods/Packages/-ailman.info.txt): failed to open stream: No such file or directory in
c:\archivos de programa\easyphp1-8\www\branch-1-9\lib\mods\modslib.php on line 380
```

Btw, I didn't have integrator enabled in the test site, by then (I wonder if it is needed).

Please, improve documentation started at:
<http://doc.tikiwiki.org/Mod+mailman>

As per Tiki23 (since a while) mods are obsolete: <https://doc.tiki.org/Mods>
