Test if the db upgrade script has been run and put a note in tiki-admin.php

Status
    ⊗ Closed

Subject
    Test if the db upgrade script has been run and put a note in tiki-admin.php

Version
    2.x
    3.x

Category
- Usability
- Feature request

Feature
    Database MySQL (MyISAM)
    Installer (profiles, upgrades and server-related issues)
    Database independence (Non-Mysql, ADOdb Postgres, Oracle, etc)
    Admin Interface (UI)
    Infrastructure

Resolution status
    Fixed or Solved

Description
    This would avoid this type of issue:
    http://tikiwiki.org/tiki-view_forum_thread.php?topics_offset=1&forumId=6&comments_parentId=21
    274

    Maybe at each release, we could add one test of the DB to see if the most recent sql additions were
    done.

    phplist does this well. Once click and your DB is in the right format.

Solution
    Done in version 3.0

There should be a table that holds a version number of the current database schema. On upgrade this version number is increased by one. Just put the statement:
update tiki_version set schema_version=23;
at the end of the upgrade script. subversions could handle developer issues.
You could also add version numbers for each table and change the upgrade script to verify the table after upgrade - but that needs much manual work.
