### Description

You want a Tiki-powered site but none of the bundled themes fit with the look & feel you want for a project? You would like an easy way to generate a style? Me too!

I have a (crazy?) idea for a Tiki CSS generator. Before I explain it, please visit the StrangeBanana:  
<http://www.strangebanana.com/>

Ideal end result would be: 1- submit logo or picture, 2- a corresponding CSS is generated, 3- result can be visualized from demo site and 4- then just use the custom css on your site!

<http://themes.tiki.org/TikiThemeGenerator>

### Solution

This is started in Tiki7, and is a work-in-progress

### Importance

7

In support of this - there are themes for DotNetNuke that you get to use to change the look and colours of your website. Having skins or Themes would be GREAT for TikiWiki and gets my vote.

dumarest 22 Feb 08 13:20 GMT-0000

A DotNetNuke site with the theme being able to change is at:

<http://www.dnnmodules.cn/Modules/Aspnet20ThemeSwitch/tabid/12535/Default.aspx>
