Description
When visiting dev.tw.o (homepage), I can't see anything in the central column of HomePage when I'm loogged in, but just the left column. When I'm not logged, I can read everything fine at homepage or any other wiki page.

My browser is Mozilla firefox 1.0.3 catalan. Maybe this has something to do with showing content for specific languages, and not speficied for the visitor's language? (or usage of default one?)

I have no idea (just started today to use 1.9.0 for production... I'm very excited after a year of long wait! 😃 Thanks marc, sylvie and all devels (if you read this bug report) for this hard work of you all! Cheers,
Xavi

P.:S Maybe adding a switch-lang-menu would help the user to select another language so that we can see the content on the homepage?

Solution
It works nowadays. dec'05
