Description
   I am often getting:

   i18nwiki@alpha ~$ cd www
   i18nwiki@alpha www$ svn up
   svn: Working copy 'temp/cache' is missing or not locked
   i18nwiki@alpha www$

   This is caused by something that is destroying some svn system files (presumably trying to clean the cache)

   Workaround is to destroy temp and to do svn up

Solution
   Seems to be fixed in branches/3.0 If it happens again, please re-open
