Description

Hi, I've just started a new Tiki 1.9.0, with new db with profile "Basic enabled for easy use", and after configuring the language in catalan, disabling some basic features, leaving just wiki, categories, etc., and clicked on the l10n Home link at the main applicationmenu, I got this error:

Fatal error: Smarty error: [in tiki-show_page.tpl line 37]: syntax error: invalid attribute name: 'pÃfÃ gina' title='seguiment' (Smarty_Compiler.class.php, line 1516) in /home/httpd/tiki19/lib/smarty/libs/Smarty.class.php on line 1088

Using style: smartiki.css, tikineat.css, but not on simple.css

If I change the language to English, for instance, I have no problems with tikineat.css, etc.

Probably, same bug as the one reported at:
