Description

I am using Tiki for educational scenarios, and frequentÃƒÂ±y I (or my students) want to change misspelled words (for instance) on long wiki pages.

Nowadays I'm taking the content out of the wiki-edit form, search and replace on in external program, anb back.
I could be nice to have this feature integrated into the edit page form.

Solution

Will be released in Tiki 1.9.3

Done in BRANCH-1-9 but now needs to optional (off by default) so people that upgrade to 1.9.3 don't get this unexpected feature.
