Description

Hello,

we don't get tikiwiki installed into oracle database. we used instantclient_11_1, compiled oci8 against the libraries, loaded the extension in php.ini, configured apache2 environment (LD_LIBRARY_PATH etc). then we restarted apache2 and started tiki-installer.php. Connection seems to work, but then the installion process aborts with following error:

PHP Fatal error: Call to a member function fetchRow() on a non-object in /srv/www/htdocs.oracle/installer/tiki-installer.php on line 43, referer: http://192.168.5.37/ora-tiki/tiki-install.php

Solution

There is currently nobody maintaining oracle compatibility.

So, sadly, we can't provide you with support for oracle anymore.
