Description

Started in 3.0, needs to be used in tiki-admingroups.php and propagated to various places where permissions are set.

Also on wish list: A way to put more emphasis on more important permissions.

Either basic vs advanced or an ordinal column (top put more important stuff at the top)

So for a wiki page, view, edit and history should be at the top or in basic while tiki_p_use_as_template and tiki_p_export_wiki should be in advanced

Importance

Filter by activated feature now works.
