Description

Here:
<http://tikiwiki.org/TikiCopyrights>

I just got:

WARNING: No such module CVS! copyright.txt

Similar to orphans pages and wanted pages, it would nice to have a way to have a list of used plugins (how many times used) from which we know how many are broken.

This happens if someone attempts to use a plugin which isn't activated. This can happen on upgrade for example or if a plugin was de-activated.

We need a way to know how many times each plugin is being used. So we can deactivate without

causing issues.

Also, approval of plugin security conflicts with wiki cache. When approving, cache should be cleared. Please test.

- Would need to watch this list
- Rick asks for a mass approve

Solution

We now have tiki-plugins.php but what do we do with "Seen in unknown object"?
