Description

Here:

<http://doc.tikiwiki.org/tiki-index.php?page=Structure&structure=Documentation> -> structur is 8.48

Yet, here: <http://doc.tikiwiki.org/tiki-index.php?page=Documentation&structure=Documentation> , it is 4.31

I don't understand the 8.48

Should be 4.31, no?

looks the same as `tiki-view_tracker_item.php?itemId=2639&trackerId=5&show=view`
comment:

hello,

I have just identified the same problem on my website (TikiWiki 3.1). I have a structure with 5 main sections, but when displaying the matching 5 pages, they are numbered 1, 2, 6, 9, 10. instead of 1 to 5.

I tried to find a workaround by changing the order of these 5 sections, hoping they may be re-numbered correctly, but it did not work.
