Description

Doesn't seem to have had any adverse effects but did see these errors when upgrading a test site from 2.2 to 3.0beta1

1. 2008-10-19 sylvieg

```
ALTER TABLE tiki_users_score CHANGE event_id event_id char(200) NOT NULL default ''
```

Specified key was too long; max key length is 1000 bytes

```
ALTER TABLE tiki_users_score ADD PRIMARY KEY 110),event_id(110
```

Incorrect sub part key; the used key part isn't a string, the used length is longer than the key part, or the storage engine doesn't support unique sub keys

```
ALTER TABLE tiki_users_score ADD KEY user (user(110),event_id(110),expire)
```

Incorrect sub part key; the used key part isn't a string, the used length is longer than the key part, or the storage engine doesn't support unique sub keys

```
INSERT INTO users_permissions (permName, permDesc, level, type) VALUES
```

```
('tiki_p_search_categorized', 'Can search on objects of this category', 'basic', 'category')
```

Duplicate entry 'tiki_p_search_categorized' for key 1
