Description

Please see:

<http://www.seomoz.org/blog/canonical-url-tag-the-most-important-advancement-in-seo-practices-since-sitemaps>

tiki-print.php -> tiki-index.php

In trackers, if you find a tracker item following a search, you have some parameters in the URL for item 6 of 70. The canonical format should be just the tracker item.

In blogs,

tiki-send_blog_post.php?postId=xyz

and

tiki-print_blog_post.php?postId=6079

should be:

tiki-view_blog_post.php?postId=xyz

Solution

Done in Tiki7 -> Canonical

Importance

9 high

Priority

45

Demonstrate Bug (Tiki 19+)

Please demonstrate your bug on show2.tiki.org

Let's make it work well in trunk, and perhaps we can backport to 6.x later...

Marc Laporte 05 Dec 10 00:06 GMT-0000

We also have a new option "base"
