Description
    In Tiki4, and in Tiki5 where accesslib hasn't been deployed

This feature is disabled: feature_games Go back Return to home page

Suggested:
if the current user has admins permissions (tiki_p_admin)
1- enable feature_games
2- add to tiki-syslog.php

We'll need to change all feature checks to use accesslib (job for 5.0)

Needs to handle more than one feature check.

Currently:
tiki-orphan_pages.php

has:

require_once('tiki-setup.php'); $access->check_feature(array('feature_wiki', 'feature_listorphanPages'));

but upon error. Ex.:
http://profiles.tikiwiki.org/tiki-orphan_pages.php

just shows one, even if two are needed.
