Description

inserting {debug} at the beginning of a template results in the following issue:

PHP (5.2.0-8+etch15) ERROR (E_USER_WARNING):

File: Smarty.class.php

Line: 1092

Type: Smarty error: unable to read resource: "file:lib/smarty/libs/debug.tpl"

that happend in every template i tested

checked the directory and filepermissions for that path, but the Permissions are ok

serching the web resultet that it culd be a missing include for smaty, but im not that far into smarty to fix it on my own

Solution

Fix SMARTY_DIR.

Done in r20942 on trunk. Proposed for Tiki 3 in r20943

Thanks Monte Ohrt
