Description

The thread options - "Style: plain, threaded, headers only" "Sort" and "Search" - are missing in trunk (noticed at r22445), even when "Display thread configuration bar." is checked on the forum admin page. I can set the thread options per-forum if I activate that preference on admin forums, but still the config bar doesn't show up for forum users.

Solution

In tiki 4, it was se that if the number of posts <10, the bar won't show, which may make sense --- but nevertheless I have added a setting under Admin..Forum to set this threshold as you wish
