Description

I have the following problem:

we wanted to upgrade our old tiki 2.2 to the new tiki 4.0 but there are some problems.

after using tiki-install.php to upgrade the old tiki to the new one the image galleries doesn't work anymore, even though it is activated in the features menu.

the problem is the following:

every time i want to go to tiki-galleries.php i get the following error:

-

The following error message was returned:

The query was:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`=?
```

Values:

1. 13

2. o

The built query was likely:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`='13'
```

-

the problem is as you see there is no error message only the query is displayed.

i tried to install a vanilla 4.0 and created two galleries where each of it has one image in it and it works fine

i compared the database tables tiki_images, tiki_images_data and tiki_galleries and they seem to have the same structure

i tried to copy the tables mentioned above from the upgraded tiki into a clean install and still get the error above

possible problem seems to be with the tiki_image table as it works fine without the images in the image tables - but the error appears only after i copy the image tables into the database

it would be nice if someone could help me / fix this problem as it would take some time to reupload all the images (then probably into the file galleries)

and besides that is there a tool that moves the images from the image gallery to the file gallery for future use?

edit: all the other php files work like tiki-list_gallery.php and tiki-browse_gallery.php

Solution

The issue is fixed in svn in branch 4.x. To resolve the issue until the next Tiki 4.X version is released, download the files tiki-browse_gallery.php and lib/imagegals/imagegallib.php from <http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki/branches/4.x/> and replace them.

Comments

Kent Barrett 06 Dec 09 22:40 GMT-0000

The query was:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`=?  
Values:
```

```
4  
0
```

The built query was likely:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`='4'
```

I have rerun tiki-install, but it didn't help. The images are still there and display in their wiki pages, we just can't get to the galleries.

Kent Barrett 06 Dec 09 23:00 GMT-0000

I can see the galleries with tiki-browse_gallery.php but not all of them

```
tiki-browse_gallery.php?galleryId=10 is fine  
tiki-browse_gallery.php?galleryId=9 is fine  
tiki-browse_gallery.php?galleryId=8 is fine  
tiki-browse_gallery.php?galleryId=7 is fine  
tiki-browse_gallery.php?galleryId=6 has an error  
tiki-browse_gallery.php?galleryId=5 has an error  
tiki-browse_gallery.php?galleryId=4 is fine  
tiki-browse_gallery.php?galleryId=3 has an error  
tiki-browse_gallery.php?galleryId=2 is fine  
tiki-browse_gallery.php?galleryId=1 is fine
```

The errors are variations of

The query was:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`=?  
Values:
```

```
7  
0
```

The built query was likely:

```
select `sortorder`,`sortdirection` from `tiki_galleries` where `galleryId`='7'
```

good to know that i am not the only one who has this error

John Crossno 27 Dec 09 04:26 GMT-0000

I was having this in 4.0 as well and tried everything, including upgrading to 4.1. Still having it there too.

John Crossno 27 Dec 09 04:51 GMT-0000

FWIW, I'm not storing my images in the database, but in the file system. Also, if I enter a link to edit one of the galleries, I get the same error as when I try to just list the galleries:

tiki-galleries.php?offset=0&sort_mode=name_asc&edit_mode=1&galleryId=36. If I remove all the sorting info and leave just the galleryId, I still get the same error. This is now with v4.1, but I presume the same would have happened with v4.0.

I find it hard to believe that this problem isn't more widespread. Maybe we are unique?

lindon 28 Dec 09 17:45 GMT-0000

Glad to find this bug reported - having the same problem with exactly the same type of error message.

For me it seems the error is triggered by having a parent directory. Changing the parentgallery field to -1 (ie, none) in the tiki_galleries table seems to clear it up for me. Not sure if that's the case for others also.

lindon 28 Dec 09 18:03 GMT-0000

Got a stack trace for the error:

Stacktrace:

- tiki-galleries.php : 0 -> {main}(array ())
- tiki-galleries.php : 423 -> get_subgalleries(array ())
- lib\imagegals\imagegallib.php : 1048 -> get_gallery_image(array ())
- lib\imagegals\imagegallib.php : 1086 -> query(array ())
- lib\core\lib\TikiDb\Bridge.php : 23 -> query(array ())
- lib\core\lib\TikiDb\Pdo.php : 109 -> handleQueryError(array ())
- lib\core\lib\TikiDb.php : 113 -> handle(array ())
