Description

Although the RFC (for example, http://www.robotstxt.org/wc/norobots-rfc.html) doesn't explicitly require a leading slash (/) before the page name, I have found that, as of late Oct, 2005, many 'bots, including Googlebots, have started requiring them.

For example, before the change,

Disallow: tiki-pagehistory.php

would prevent well-behaved 'bots from trying to index tiki-pagehistory.php. However, after the change, I had to have:

Disallow: /tiki-pagehistory.php

in robots.txt, or else all my page history would be indexed! I verified this using my server log, and also by doing google searches against my site for phrases that only appeared in page history. I have every reason to believe this is a problem for all other TikiWiki-based sites.

Others have noticed this. There is discussion in the forums at:

- Googlebot ignoring robots.txt includes a graph of my bandwidth usage before and after.
- Adding <meta name="robots" content="noindex,nofollow"> to History pages
- Yahoo search indexes Print pages instead of Read pages

Solution

Putting a leading slash before all page references in robots.txt solved the problem. See http://ihuck.com/robots.txt (a TikiWiki site), compare to e.g. http://dupli.tikiwiki.org/robots.txt

- 1. Change the robots.txt in the CVS so that there is a leading slash before all page references (there is already a leading slash before all vdir references)
- 2. Post an article on tw.o urging existing users to change their robots.txt
- 3. Change the robots.txt on all sites *.tikiwiki.org that use the standard robots.txt, for example, dupli.tw.o, doc.tw.o, probably others.

I have many years of web dev experience, and two plus years experience with PHP and TikiWiki, but almost no CVS experience. I'm happy to learn CVS and implement this solution, but I am hoping first for some feedback from the community re have I overlooked any reason not to make these changes. Thanks.

Assign this back to me and I'll start working on the changes (except for the 3rd change which a *.tw.o admin will need to do).
