### Description

I have a strange problem on Tiki 2.0RC2:

I have two similar TikiWiki-installations. One just for testing on my Linux-Server and the second on a WinNT-Server. The Windows-Server is the one we want to/have to use for our Wiki 😞

On my Linux-Server works everything.

On the Win-Server donâ€™t work wysiwyg-editorâ€™s â€œInsert/Edit an internal wiki linkâ€-button. The â€œwindowâ€ opens but it shows only this animated waiting-bar. (See the picture)  
Any other button works fine!

### Solution

This seems to be solved in the first release candidate of Tiki 6.

Comments

Xavi (as xavidp - admin) 30 Aug 08 19:03 GMT-0000

how can `./lib/fckeditor_tiki/plugins/tikiimage/fck_tikiimage.php` be attempting to use a template `fck_tikiimage.tpl` which doesn't exist? Could it be the reason to explain this bug?

Just in case, see also comments on:

<http://dev.tikiwiki.org/bug1831>

where there is a patch to solve other things in wysiwyg, but not this yet up to date

PaulN 03 Sep 08 11:54 GMT-0000

Again, a windows server (apache) install and all we see is the "progress squares" and nothing happens after that.

montazek 19 Nov 08 18:00 GMT-0000

windows server 2003 an windows xp

djrakun 06 Jan 09 14:35 GMT-0000

both a slackware and an ubuntu LAMP server both working fine with this shortcut. The WinServer is the one that can't pull up the dialogue. Here is my config

```
Configure Command cscript /nologo configure.js "enable-snapshot-build" "with-gd=shared" "with-extra-  
includes=C:\Program Files (x86)\Microsoft  
SDK\Include;C:\PROGRA~2\MICROS~2\VC98\ATL\INCLUDE;C:\PROGRA~2\MICROS~2\VC98\INCLUD  
E;C:\PROGRA~2\MICROS~2\VC98\MFC\INCLUDE" "with-extra-libs=C:\Program Files (x86)\Microsoft  
SDK\Lib;C:\PROGRA~2\MICROS~2\VC98\LIB;C:\PROGRA~2\MICROS~2\VC98\MFC\LIB"
```

tpinet 03 Nov 10 11:27 GMT-0000

We are still seeing this in v5.1. We are also using Windows Server 2003, Apache 2.2, PHP 5.3.

I think that this is the same bug as 1908  
([http://dev.tiki.org/tiki-view\\_tracker\\_item.php?trackerId=5&itemId=2340](http://dev.tiki.org/tiki-view_tracker_item.php?trackerId=5&itemId=2340)).

Philippe Cloutier 05 Nov 10 02:11 GMT-0000

This seems to be fixed in Tiki 6.0 RC1, with CKEditor. Can anyone reproduce?

tpinet 10 May 11 15:34 GMT-0000

We are using v6.2 and this is gone with the new editor.
