Description

I have another problem on TikiWiki 2.0RC2:

I have two similar TikiWiki-installations. One just for testing on my Linux-Server and the second on a WinNT-Server. The Windows-Server is the one we want to/have to use for our Wiki 😞

On my Linux-Server works everything without problems.

On the Win-Server donâ€™t work "approve+staging".

If I wont approve changes it shows me this error:

An error occured in a database query!

Context:

File tiki-approve_staging_page.php

Url tiki-approve_staging_page.php?page=Baustelle_Test

Query:

```
update `tiki_pages` set `description`=? `data`=? `comment`=? `lastModif`=? `version`=? `user`=?  
`ip`=? `page_size`=? `is_html`=? `wysiwyg`=? `wiki_authors_style`=? `flag`=? `lockedby`=?  
where `pageName`=?
```

Values:

0 1 <p>Test</p>

2 approved by ottonormal

3 1217330865
4 6
5 ottonormal
6 10.40.153.101
7 225
8 1
9
10 NULL
11
12
13 Test
Message:

Built query was probably:

```
update `tiki_pages` set `description` = `data` = '<p>Test</p>' `comment` = ' approved by  
ottonormal' `lastModif` = '1217330865' `version` = '6' `user` = 'ottonormal' `ip` = '10.40.153.101'  
`page_size` = '225' `is_html` = '1' `wysiwyg` = `wiki_authors_style` = NULL `flag` = `lockedby` =  
where `pageName` = 'Test'
```

I believe I can verify this bug. Probably should have looked here first before fumbling around for the last 3 weeks and wasting the time of the nice forum folks. From what I can tell, you're getting the same `wiki\_authors\_style` = NULL error. I'm stuck with a windows server too... strange it only affects windows?

Which web server do you use?
