Description

See:

http://dev.tikiwiki.org/tiki-tracker_rss.php?trackerId=5

An example:

http://dev.tikiwiki.org//tiki-view_tracker_item.php?trackerId=5&itemId=280

Affects most of not all RSS feeds. Happens in non multi-tiki setting.

Double slash is a pretty common problem - happens sometimes, not always! That's hard to track and not really RSS related... often happens with tiki-login, too...

marc found a reproducible error, that also is a strong indication for where the double slashes occur - it seems that the last slash in the URL gets doubled, like here:

http://www.doc.tikiwiki.org/img/wiki_up/WikiUser-HomePage.png

You get this double-slashed URL, when you select "View image" from the context-menu of your browser on this page:

This one is in a subdirectory and is not plagued by extra slash...
